

MP 10 + MP 12 mixing pumps

1

MP 10 + MP 12

The smallest Putzmeister mixing pumps of all time. And believe it or not ... both offer everything you expect from a genuine Putzmeister mixing pump: continuous mixing, great output, easy to dismantle and a comprehensive range of accessories as standard.

Ideal machines for small companies, smaller jobs and especially for situations where only a 230 V power supply is available.

MP 10 + MP 12 – the two mini mixing pumps

2

Simply release the toggle locks of your MP 12 (MP 10 has wedge closures). You simply remove the motor and pump units in one.

Both mini mixing pumps can be used for dry premixed mortar interior and exterior, and for paste-like and liquid materials of grain size up to 4 mm. In contrast to most pumps of this size, however, these two models **are real mixing pumps**.

The MP 10 and MP 12 are compact, manoeuvrable and light weight. They fit into any car and once on site they are easy to carry to the place where they will be used.

The MP 10 and MP 12 are really easy to dismantle. This makes transport even easier, speeds up cleaning.

The MP 10 and MP 12 are easy to operate. You simply connect the power and water supply, start the pump and set the flow and water rate. Then you fill the hopper with material and check the consistency of the mortar at the pressure outlet. Now all you have to do is to fix the mortar hose and start. During use, you can conveniently control the pump at the spray gun.

The operating elements are located at the rear of the mixing pump, where they are easy to see and well protected.

The MP 10 and MP 12 have a whole range of practical details. Despite their small size, they both have plenty to offer. A vibrator attachment ensures that no material residues are left in the hopper.

With 45 l (MP 12) and 30 l (MP 10), the hopper capacity is large enough to ensure stress-free working.

The integrated water pump provides a constant, adequate water pressure. If the water supply is suddenly interrupted, the pump stops automatically to prevent dry running.

The MP 10 and MP 12 have all the necessary accessories. Everything you need for use is already provided.

- Compressor (180 l/min)
- Water pump
- Grid with sack opener + vibrator
- Compressed air remote control
- 10 m air hose and 10 m mortar hose
- Spray gun
- Standard accessories

Both models can also be bought without compressor, air hose, mortar hose and spray gun:

MP 10 part no. 111 594.007 and

MP 12 part no. 111.595.006.

So if you want a small, manoeuvrable machine and you only have a 230 V power supply available, use the MP 10 or the MP 12.

3

The operating elements are located centrally and are well protected to the rear of the two mixing pumps (MP 12 shown here).

4

Here you can set the water rate conveniently and accurately.

Technical Data

Working pressure	max. 30 bar
Delivery rate*	3.5 up to 13.5 l/min
Grain size	max. 4 mm
Worm pump	N13S
Motor	230 V/ 50 Hz
Drive	1.5 kW, 106 up to 403 rpm
Hopper content	30 l (45 l)
Discharge connection	V 25
Weight	115 kg
Filling height	60 cm (90 cm)
L x W x H (MP 10)	150 x 53 x 79 cm
L x W x H (MP 12)	150 x 62 x 102 cm

Part no. (MP 10) 111 594.010

Part no. (MP 12) 111 595.019

- Plastering machines
- Fine plaster spraying pumps and paint pumps
- Screed pumps
- Professional high-pressure cleaners
